Objectives

Engaging patients, health care administration, government & academic partners, senior nurses from the community & continuing care, and Nurses Specialized in Wound, Ostomy and Continenence (NSWOCs) to:

1. Provide the current status on best practices in wound, ostomy and continence within the Province of Ontario.
2. Evaluate a patient's experience living with an ostomy in Ontario.
3. Determine the economic burden for people living with an ostomy through the review of the ostomy impact study.
4. Discuss the delivery of quality care supporting a positive patient experience in the Ontario home care setting.
5. Discuss interprofessional skin and wound care innovation in the province of Ontario.
